

Fundamentals of Modern Viticulture

Wine-Workshop

This workshop provides a clear and accessible introduction to the fundamentals of modern viticulture. The focus lies on the key factors that shape the character, quality, and style of a wine from terroir and the structure of the vine to training systems and the annual cycle in the vineyard.

The workshop is designed for anyone who wants not only to drink wine, but to understand it more deeply: structured and illustrative.

The format is rounded off by a guided tasting, where theory and practice come together in the glass.

We look forward to seeing you.

Torsten & Ilya
